ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1

1. [redacted] the Smolensk Aircraft Factory, No 35 [redacted] was composed of twelve separate shops and was principally engaged in major overhauling of all types of aircraft and aircraft engines. There were three experimental shops; i.e., they produced experimental aircraft for the TsAGI (Central Aero-hydrodynamic Institute) for a period of about three to five months. These shops were "Sovershemno Sekretnye" (Top Secret) and only those who worked in them were admitted. During this period of experimentation many specialists from factory No 156 worked in these shops. Factory No 156 was located in Moscow and was under the control of the Central Aero-hydrodynamic Institute.
2. When World War II broke out, factory No 35 was evacuated to Kuibyshev where it began manufacturing aircraft propellers of all types. Most of its output was directed to the propeller needs of factory No 1 which was also moved to Kuibyshev and produced ground attack aircraft. The engines for these aircraft were produced at factory No 18 which was moved to Kuibyshev from Voronezh.
